Frequently Asked Questions

What are common applications?

- ▶ The simple answer is if this is a product you have used in the past, then we have replacement rollers for you to purchase through our distribution.

What is the idler designed for?

- ▶ CB504 Idlers are designed to easily replace a bearing and continue to use the can and frame for MARCO or Cedarapids style idlers.

What is special about the bearings?

- ▶ Compared to other idlers, CB504 style idlers are designed and manufactured with sealed bearings versus to an external seal design.
