

# Rubber Disc Returns

Cost Effective, Prevents Material Buildup

## Quick Specs

- ▶ **Classes:** CEMA B, C, D, and E
- ▶ **Roll Diameters:** 4", 5" and 6"
- ▶ **Belt Widths:** 18" - 72"

## Frequently Asked Questions

### What are common applications?

- ▶ In sticky applications when material cakes and builds up onto return idler rolls eventually causing belt tracking concerns.

### Why this style over others?

- ▶ The answer comes down to simple economics. Compared to the Urathon® Return Roll, our Rubber Disc Returns can cost up to 20% less.

Rubber Disc Return Idler

## Features and Benefits

### Prevent Material Buildup

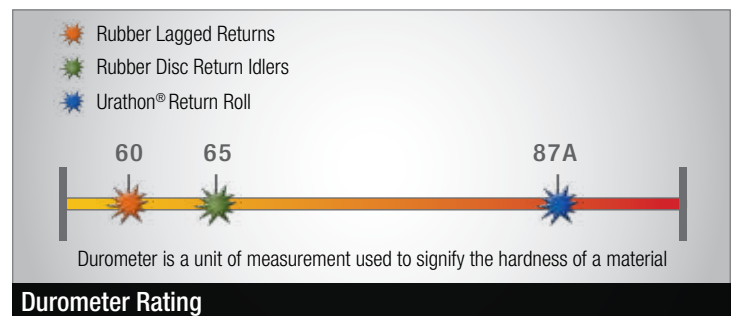

- ▶ Sheds material in moist, sticky applications
- ▶ Discs designed with self-cleaning, flat surface
- ▶ Discs prevents buildup on roll and on return side of belt

### Save the Belt

- ▶ Provides better support for belting
- ▶ Reduces costly belt tracking issues caused by material buildup
- ▶ Disc spacing prevents belting from getting stuck within outside discs

### Long Lasting Return Rolls

- ▶ Synthetic rubber stable in wide temperature range
- ▶ Better wear characteristics than steel rolls
