SUPERIOR INTRODUCES NEW HEAVY-DUTY SCALPING SCREEN FOR LARGE FEED SIZE

Morris, Minn. – [Superior Industries, Inc.](#), a US-based manufacturer and global supplier of bulk material processing and handling systems announces another advancement in its lineup of [Guardian® Horizontal Screens](#) with a brand-new heavy duty scalping model.

The new HD scalping screen handles a maximum feed size of 18-inches (457mm). This surpasses its medium-duty predecessor, which maxes out at 14-inches (355mm).

The HD screen is equipped with a perforated top deck, or punch plate, made of heavy-duty 3/4-inch AR steel. A slight slope facilitates the movement of feed material for efficient screening.

Superior manufactures more than a dozen models of its popular Guardian Horizontal Screen series in Columbus, Nebraska, one of its four American manufacturing facilities. Horizontal screens are available in two, three, or four-deck configurations and footprints from 5x16 to 8x20.

For more information on Superior's vibratory product line, visit superiorind.com/screening.

About Superior Industries, Inc.

From Rock Face to Load Out®, [Superior Industries](#) engineers and manufactures groundbreaking bulk material processing and handling equipment plus cutting-edge components. The 52-year-old manufacturer supplies bulk [crushing](#), [screening](#), [washing](#) and [conveying](#) systems plus all related parts and services for industries like aggregates and mining.
