SUPERIOR ADDS WASHING EQUIPMENT TO ROCK MACHINERY DEALER PORTFOLIO

Morris, Minn. – Superior Industries, Inc., a US-based manufacturer and global supplier of bulk material processing and handling systems, is deepening its partnership with Rock Machinery. Effective immediately, the Wisconsin-based dealer adds Superior's wet processing equipment to its portfolio in Wisconsin, Illinois, and the western half of Michigan's Upper Peninsula.

Already representing Superior's crushing and screening lines, Rock Machinery now supports the full spectrum of aggregate processing equipment — crushing, screening, and washing — for wet and dry applications.

"Rock Machinery has consistently demonstrated a deep commitment to serving customers with strong technical knowledge and best in class responsiveness," says Jeff Gray, Director of Sales at Superior. "They know the market well, and this next step just makes sense."

Superior's washing portfolio includes a wide range of equipment for scrubbing, classifying, rinsing, dewatering, and water recycling. These products, combined with Rock Machinery's established field support, will help aggregate producers in the region meet their production goals with greater confidence and reliability.

The Rock Machinery team is based in Allenton, Wisconsin, with additional coverage throughout the region.

About Superior Industries, Inc.

Superior Industries is a deeply-rooted, privately-owned American manufacturing company whose products play a pivotal role in production and transportation of ingredients used to build the world's infrastructure. Specialties include crushing, screening, washing, and conveying systems, alongside comprehensive parts and services that support robust construction aggregates production from Rock Face to Load Out®. Equipped with one million square feet of manufacturing space and more than 100 engineers, Superior is headquartered in Morris, Minnesota, with four additional production facilities in the United States, plus international manufacturing locations in Canada, Brazil, and Asia.
